# **marturion Documentation**

***Release 0.2***

**Eldarion**

July 31, 2014

<b>1</b>	<b>Development</b>	<b>3</b>
1.1	Contents . . . . .	3

A simple testimonials app for your Django site.

The source repository can be found at <https://github.com/eldarion/marturion>

## 1.1 Contents

### 1.1.1 Installation

- To install `agon_ratings`:

```
pip install marturion
```

- Add `marturion` to your `INSTALLED_APPS` setting:

```
INSTALLED_APPS = (  
    # other apps  
    "marturion",  
)
```

### 1.1.2 Usage

Using *marturion* is fairly straight forward. You consume quotes through the use of two different template tags. One that returns a queryset of all testimonials and one that returns a randomized queryset:

```
{% load marturion_tags %}
```

```
{% random_testimonials <number> as quotes %}
```

or:

```
{% load marturion_tags %}
```

```
{% testimonials <number> as quotes %}
```

If you just want a single random testimonial you can use:

```
{% random_testimonial as quote %}
```

To input quotes, you simply add them through the Django admin.

### **1.1.3 ChangeLog**

#### **0.2**

- Fixed documenation bug
- Added a template tag for fetching a single random quote

#### **0.1.4**

- Fixed bug introduction with last bug fix.

#### **0.1.3**

- Fix bug where the random query select would make it hard to use queryset in a template using index accessors.

#### **0.1.2**

- Fixed a typo in the model name

#### **0.1**

- initial release
